## Quixote . . .

portation (New York State, county and municipal), Emergency Services (police and fire departments), and Federal, State and County Parks departments. Additionally, they serve installation and service contractors, engineering firms, data collection service providers, and retail outlets (malls, casinos, etc.). The QTT product line will be handled by NorthEast Signal's sales team, consisting of Roger Spain, Paul Jebbett and Bill Moore. Customer Support will be handled by Charles Blount.

"Our customers rely on NorthEast Signal to provide expertise in traffic and data collection technologies," says Bill Moore, Sales Manager with NorthEast Signal. "We seek only world class manufacturers to meet our customer's unique needs. We are known for providing reliable, cost effective solutions for our clients and customers and for follow-on support as needed. [QTT] provides highly reliable, quality products that meet customer's needs in traffic data collection, measuring devices and weather related data collection. This is an emerging market for customers in New York."
