Carmanah Receives Additional \$600K Order from U.S. Defense for Solar LED Airfield Lighting

Carmanah Technologies Corporation (TSX: CMH) announced the Company has received an additional order from the United States Department of Defense for solar powered LED airfield lighting.

This order is valued at approximately \$600,000 and consists of taxiway, runway, approach, apron edge and obstruction lights. The lights are destined for multiple forward operating bases at undisclosed locations.

Carmanah is the largest supplier of self-contained solar LED airfield lighting in the world. The Company's lights are highly advanced and have been field-proven to endure difficult environmental conditions, including extreme temperatures, poor solar conditions, sandstorms and flooding. They have been used for all ranges of airfield applications, such as permanent primary lighting, temporary lighting during airfield construction or upgrades, emergency back-up lighting, as well as expedited portable lighting during defence or humanitarian aid operations.
