WORK ZONE CERTIFICATION

IMSA Temporary Traffic Control Technician

Description: This entry-level certification addresses the fundamentals of temporary traffic control techniques. The exam tests the students' knowledge of the design, installation and maintenance concepts for traffic control devices and defines relevant standards for typical urban, rural and highway scenarios. Students are tested on their ability to identify which devices would be needed and their proper placement in the work zone per MUTCD standards. It also covers traffic control theory and equipment, hand signaling tools, typical construction scenarios and traffic terminology. This certification tests the important knowledge to keep workers, pedestrians and the motoring public safe in Work Zones.

Target Audience: Recommended for all workers performing work in the public right-of-way of the road.

Prerequisites: None.
